Find safe, uncongested places to drop off your passengers.

Crowd collection resource of places to drop off passengers. The name originates from the 1960's Pittsburgh Trolley Station drop-offs where wives would drop off their husbands.

Travelers can find little known, less congested airport drop-off curves. Parents can find a safe place pickup 15 year olds from the mall, or young athletes at a high school event. Members can add new locations or annotate existing locations.

Users can filter by context such as Airport, Mall, Stadium, and School. Advertisers target using these contexts.

The user experience centers around the Kiss in a humorous, light way: red lips graphics and animations, Kiss sounds and Kiss puns.
